

# *To Clean*

It is recommended to scrape off any remaining product off your unit.

Hold the hair in a bun lace side up, run the unit under hot water until it all the product comes off. Use oil base glue remover or any grease stripping soap on the area of the product, use a soft brush if necessary, to wash off the concealer. Condition and shampoo as normal

With care you can wash your unit in cool water or even go for a swim without disrupting the product.

The concealer looks darker in the tube however, it will apply shades lighter . After a few days add a tip of oil to refresh the concealer again if it looks dull. See our website and IG for tips [www.perfectlineswiss.com](http://www.perfectlineswiss.com) @perfectlineswiss

## *Ingredients*

Bentonite mineral powder  
Turmeric Beetroot powder  
Alpina and Rose Water  
Shea butter  
Lemon & Sage Oil

*Patent Pending*

# *Application Tips Tricks & Care*

- ▶ Do not wind up the tube before softening up the product, as this could damage the winder.
- ▶ It's recommended to use a wig cap to cover your hair before application to make clean up easy. Turn wig inside out to reveal the lace and set on a wig head.
- ▶ Pin the wig secure with T-pins ensure you brush all hair away from the hairline.
- ▶ Placing the covered tube, top side up in a cup of VERY hot water for 2.5-3:00 Minutes for the 15ml tube and 1-1.5 minutes for the 5ml tube.
- ▶ You could also use your blow dryer to warm up the concealer to make it soft.
- ▶ Wind up the tube to about 1mm, do not wind up too much of the product, as this will affect the application and the product may brake off.
- ▶ Do not over warm the product or it will become TOO soft and seep through TOO much into the hair.
- ▶ Gently press and stroke forwards, backward or sideways until you reach desired coverage. (1 layer is enough) You can leave 2mm of the lace hairline out, to ensure a secure hold with your glue.
- ▶ If the concealer becomes dry during the application, use you're blow-dry to soften up the product on the lace and use the flat side of the tube to blend and smooth out the product.
- ▶ You could also put the tube back into the hot water to soften it up again.
- ▶ Now Use your blew dryer on cool air to cure the product for 1 minute.
- ▶ Turn the wig over, select your parting space then use the flat side of your comb to press the product into the lace until knots disappear and your part is defined.
- ▶ Add a few small drops of your favourite liquid hair oil to clean up transfer of the product off the hair as well as to moisturize the parting space.
